

JOIN THE CELEBRATION!

NORTHWEST BIRDING FESTIVAL

Annual birding festival held in one of the Pacific Northwest's premier bird viewing areas.

The annual multi-day birding festival held mid-March celebrates the incredible variety of migratory birds that flock to the coastal waters of Drayton Harbor, Birch Bay and Semiahmoo Bay at the northwest corner of Washington State.

The festival provides free activities both indoor and outdoor for the entire family. Festival activities include:

- live raptor presentations
- wildlife exhibits and displays
- kids' activities
- photography workshops
- expert speaker presentations
- guided field-trips and more

For complete details on the festival, visit:
www.wingsoverwaterbirdingfestival.com

Guided fieldtrips.

Long-tailed Ducks are one of the deepest diving ducks, diving up to 200 ft. to forage. They also spend more time under water relative to their time on the surface. They are often seen during the winter in the deeper water between Blaine Pier and Semiahmoo Spit.

Kids' activities.

Birdwatching Ethics

With more and more people coming to observe birds, it is essential that a few rules and regulations be observed to ensure that the birds in the area have ample sites for resting and feeding. The only rules that apply are common courtesies and considerations that apply to other humans, as well as wildlife.

- Respect private property and stay on established routes.
- Do not disturb or pick up any birds, especially young birds.
- No camping or parking except in designated areas.
- Keep dogs on a leash, unless in specified off-leash areas; take time to pick up dog feces; and do NOT allow your dog to chase birds.
- Resist the urge to feed birds. They do quite well on their own.

Come visit us!

Located between Seattle and Vancouver, B.C., Blaine, Birch Bay and Semiahmoo offer spectacular scenery and a variety of recreational activities. In addition to birdwatching the area offers:

- crabbing
- clamming
- beachcombing
- kayaking
- shoreline walks
- cycling along trails
- waterfront parks & playgrounds
- year-round festivals

Blaine, Birch Bay and Semiahmoo offer a variety of accommodations. From a 4-star resort, charming bed and breakfast, cozy cabins, RV camping and campground sites. You're sure to find your fit. Explore shops and enjoy a variety of eateries with delicious entrées from both land and sea.

For more information contact:

Blaine Welcome Center
546 Peace Portal Drive, Blaine, WA

The Birds

Some of the finest birdwatching in the country can be found right here in the northwest corner of Washington state.

The immense estuarine environments from Semiahmoo Bay to Birch Bay are home to some of the largest concentrations of wintering waterfowl on the Pacific Coast. Birdwatchers congregate here, as well, to enjoy the spectacle of the active, massed flocks of numerous species.

These protected embayment's extending from Birch Bay to Semiahmoo Bay are integral parts of the Audubon Washington's State Great Birding Trail. The area of Drayton Harbor/Semiahmoo Bay is one of 75 Important Bird Areas in the state. The sheer number of birds of the many species that utilize these inland waters can be spectacular and often incomprehensible, especially from late fall through spring, and during migration.

One of the unique features of this area is the opportunity to experience a variety of birds close at hand.

More than 250 species of birds can be found in the marine, upland, and open-meadows of this area. The open waters of Semiahmoo Bay have some of the heaviest concentrations of waterfowl. Numerous diving birds can be seen diving for herring that spawn in these local waters in late winter and early spring.

Many birds that breed in the northern latitudes congregate in the expansive bird-friendly habitats of northwestern Washington state. The rich tapestry of birdlife in this area attracts birdwatchers from all over the country and, while winter birding is best, spectacular birds are here year-round.

COMMON GOLDENEYE

Goldeneyes breed in the boreal forests of Canada and Alaska where they nest in tree cavities. They are visitors each winter to our protected coastal waters.

HARLEQUIN DUCK

The Harlequin rivals the Wood Duck as the most colorful of waterfowl. They nest on rushing mountain streams and spend the rest of the year on rocky salt water shorelines.

BLACK BRANT

This small goose that is about the size of a common Mallard stages one of the most spectacular migrations of all waterfowl. The largest concentration of Brant occur here between February and May.

DUNLIN

The most numerous of the wintering shorebirds in the area, Dunlin flocks can number in the thousands and provide birdwatchers with delightful displays of aerobatics as they sweep onto the flats to feed and elude the ever – present Peregrine Falcons.

GREAT BLUE HERON

This large wading bird is a year-round resident of Whatcom County and, with several large rookeries in the area, the shallows can often be filled with these magnificent, efficient fishers.

DID YOU KNOW?
The Birch Bay, Great Blue Heron colony is one of the largest on the West Coast with over 300 nesting pairs.

RED-BREASTED MERGANSER

This member of the colorful merganser family is one of the more spectacular diving birds to be found in the deep water channels between Blaine and Semiahmoo.

OYSTER CATCHER

Black Oyster Catchers are easy to identify due to their large black body and long, bright orange bill. They are often seen along our rocky shorelines and beaches.

“I just set up my tripod, sit on the beach and wait for the birds to come to me.”
